Continued Prosecution Application

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Streu et al and Scherzer et al.

Both of the cited prior arts disclose polyester polyols useful for the preparation of polyurethanes by reaction of the polyols with polyisocyanate. The polyesters are derived from the reaction of polycarboxylic acid comprising glutarate units and reacted with a diol. See columns 1, and 4-8; and Tables I and II in columns 15-16 showing Examples 7-12. It is the Examiner's position that the claims have features and characteristics as claimed. Other characteristics not expressly disclosed, such as the MW would be inherent in view of the other process features and characteristics disclosed.

3. Claims 1-6 and 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoaglin et al 2,909,499.

This prior art discloses vinyl chloride composition for polyesters derived from alkyl glutarates. See columns 2, 3, and 5 and Example 1 and 7. The prior art compositions have features as claimed.

4. Other references listed on PTO-1449 have been made part of the record.
